Product Information

The **TRU-LEVEL™** Edge of Dock leveller is a manual unit that can be used for a variety of loading configurations and requirements. A high-quality, low-maintenance dock levelling system, the **TRU-LEVEL™** Edge of Dock Leveller is designed to operate in situations where an existing loading bay has no system and can easily be retro fitted. With pole-operated gas strut for ease of use, this **TRU-LEVEL™** system is designed to speed up loading, protect personnel and increase productivity.
