Product Information

The **TRU-LEVEL™** Telescopic Dock Leveller is an extending unit that is ideal for difficult loading configurations with restricted access. It provides an elongated reach to fully bridge the gap between the loading bay and truck. A high-quality, low-maintenance dock levelling system, **TRU-LEVEL™** Telescopic Dock Leveller is designed to operate with the widest possible range of truck designs. Extremely durable with push-button ease-of-use, this unit will speed loading, protect personnel and increase productivity.
