Product Information

The **TRU-LEVEL™** Vertical Dock Leveller is a hydraulic dock leveller for loading shipping containers that are still on a truck. It is designed specifically for sites that require a loading platform that can be retracted upright and will enable full sealing of the dock area when the door is shut. Extremely durable and easy to maintain, the **TRU-LEVEL™** Container Dock Leveller brings push-button simplicity to receiving trailers with 20ft or 40ft containers. The **TRU-LEVEL™** system is designed to speed loading, protect personnel and increase productivity.

Technical Specification
